Aleut Management Services – Health, Safety and Environmental Policy

The safety of our workers is of paramount importance in everything we do. We believe that all injuries are preventable. We will perform all work with the goal of **zero injuries** to ourselves, our colleagues, our customers and the public.

To meet this expectation, we will:

- Recognize and aggressively manage the risks inherent in our work activities.
- Hold ourselves and others accountable to the highest standards of working safely.
- Stop work to re-plan our work activity if we recognize an unsafe condition or unsafe behavior within ourselves, our colleagues, or others on the worksite.
- Perform work properly in compliance with established regulations, standards, and procedures.
- Not take shortcuts, or perform other at-risk behaviors, or allow carelessness on the job.
- Aggressively and deliberately work to minimize unsafe acts and unsafe conditions through incident reporting, investigation, and corrective actions.
- Apply lessons learned and best practices in all that we do.
- Be stewards of our environment and the communities in which we work.
- Accept nothing short of excellence in the protection of our workers.

Our success is directly related to both our willingness to take care of each other and the expertise we demonstrate in completing our work safely. Nothing other than **zero injuries** is acceptable.

Mike Mikita
